

# KENDOR

31275 Fraser Drive • Fraser, Michigan 48026 • (586) 293-7111 • www.kendor.com • info@kendor.com

Kendor has always been able to provide quick, inexpensive blanks using a steel rule die. However, in order to meet the ever changing industry standards and blank requirements, we no longer make steel rule dies. We have evolved into making our own, patent pending, steel tooling using a new state of the art Hurco machining center. This Tooling now allows Kendor to provide our patent pending hard tooling and laser welded edge quality blanks quickly and less expensive.

## ► NEW AUTOMATION

- 2 automated press lines capable of class A parts
  - Fully automated system allows for material remain in original packaging from mill to press, then blanks are stacked and wrapped in a protective cover and banded.
- Up to full body size
  - Large bed size of 80x144 allows us to blank inner and outer blanks without disturbing the surface.

## ► NEW TOOLING

- Materials
  - Plastic, Metals, Composites
- Prototype, Low volume and full production runs
- Low upfront cost
- Build Time is reduced
- Die Changes
- Multiple cavity dies
- Reduced Scrap Rates with improved nesting capabilities
- Setup and change over times

## ► IMPROVED PARTS

- Edge Quality
  - Equivalent to hard blanking tools
  - Ability to Blank Laser weld edge quality
- Flatness

## ► CLASS A PARTS

Able to run clean parts never touched by hands

## ► OTHER SERVICES

Shearing  
Press Brake  
Turret  
Laser Cutting
